Compatibility with general-purpose communication: VV type

Simple! PTP positioning

Positioning function is embedded as standard in general purpose interface unit "ALPHA5 VV".

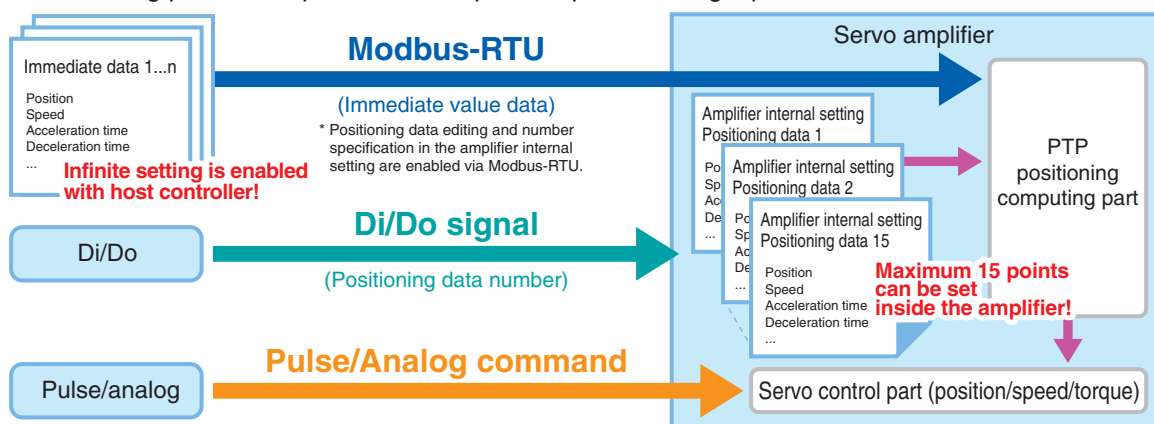

As the ALPHA5 VV type is the standard model, external positioning unit or dedicated items for positioning are not required.

3 in 1 !

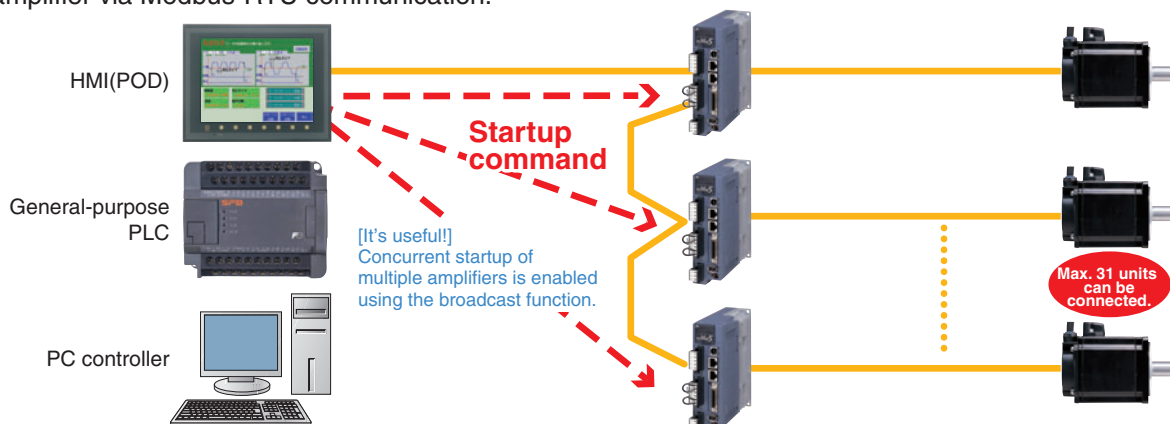

Following operations are enabled by one unit:

- Positioning via Modbus-RTU communication (immediate value data)
- Positioning via Di/Do signal (positioning data 15 points*)
- Controlling positions, speeds and torques via pulse/analog input

Simple connection! Modbus-RTU communication

Operations such as PTP positioning operation, parameter edit, and various monitoring are enabled. All you need to do is connect HMI (POD), general-purpose PLC, or PC controller directly to servo amplifier via Modbus-RTU communication.

Other makers' products compatible with Modbus-RTU

Any HMI (POD), general-purpose PLC, or PC controller compatible with Modbus-RTU can be connected to servo amplifier easily regardless of maker.

Features

Total extension 25m (maximum), 32 connection units (maximum)

Fast and accurate positioning is realized.

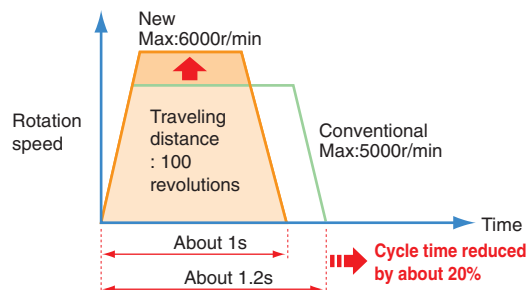

New high speed servo control engine
Frequency response 1500Hz

Increased motor rotation speed
Max. rotation speed 6000r/min

Fine resolution encoder
18-bit absolute/incremental 262,144 pulses
20-bit incremental 1,048,576 pulses

High performance frequency response (1500Hz), high rotation speed (6000r/min) and high resolution encoder reduce the cycle time and make faster and more accurate positioning and settling possible.

■ Cycle time reduction 1.2s → 1s

■ Time necessary to settling to 1μm accuracy 4ms

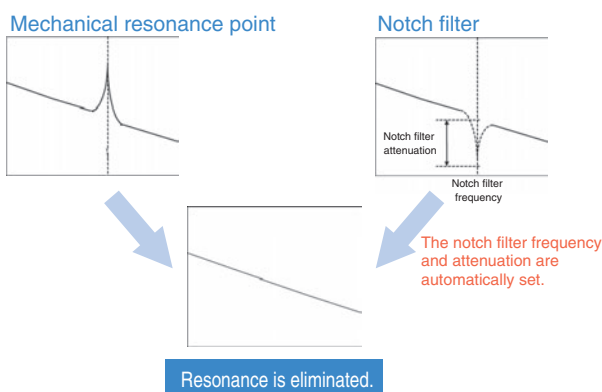

1/10000 rotation accuracy with a 10mm ball screw = 1μm

New control functions

New notch filter (auto notch filter)

The notch filter is set automatically upon detection of mechanical resonance. Because detection and calculation are always conducted while the auto notch filter remains turned on, resonance frequencies changing by time are effectively filtered.

Homing by hit-to-stop

Wire saving can be achieved with elimination of the limit switch and over travel signal. Moreover, several homing functions allows homing program creation to be simplified only by combining the servo parameters. Creating complicated program of homing in the host controller is no more necessary.

Motor stop method setting is enabled

- Alarm occurrence
 - Main power supply is OFF.
 - Servo ON signal is OFF.
- Selection among rapid deceleration stop, DB stop, and coast-to-stop is enabled under the above conditions. Since limiting output torque at desired value is possible even if rapid deceleration stops is selected, impact shock to the machine can be reduced.

* However, it is enabled when the control power supply is input.

Reduced space

Size reduction of servomotor and servo amplifier

- Servo amplifier

The installation area is reduced by 25 to 30% when compared with our conventional model.

- Servomotor

The overall length is reduced by about 15% when compared with our conventional model.

Close installation

The servo amplifier can be installed side by side without a clearance. The installation space in the control panel of the machine is reduced.

* 80% ED rating in case of close installation

There is no limitation if 5mm or a larger clearance is placed.

Close installation can be made even if the ABS backup battery is installed.

The battery can be replaced without difficulty while the servo amplifier is left installed.

The designed life time of the battery is about 35000 hours. (Retention time with power turned off)

Long life design

The designed service lives of various parts of the servo amplifier are extended.

Electrolytic capacitor: 10 years

Cooling fan: 10 years

* Operating conditions

- Ambient temperature: Average 30°C/year
- Load factor: Within 80%
- Operation ratio: Within 20 hours/day

Compliance with various standards

Compliance with CE marking and UL/cUL

The standard model complies with CE marking and UL/cUL.

Compliance with RoHS directive

The standard model complies with EU's specific hazardous material limitation (RoHS) directive. The servo system is environmentally friendly because use of six hazardous materials is limited.

<Six hazardous materials>

Lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyl (PBB), polybrominated diphenylether (PBDE)

Environmental resistance

IP67 (servomotor)

The standard servomotor model is compatible with IP67* and it can be used in the environment susceptible to water or dust splashes.

* Except for shaft-through part and connectors

Compatibility

Compatibility with FALDIC- α , - β and -W motors

Because compatibility with FALDIC- α , - β and -W Series servomotors is assured, the new amplifier meets requirements for replacement of existing products flexibly. (Compatibility with individual products is planned.)

Improved usability: PC Loader

USB connection

The amplifier can be connected to PC using a commercially available USB cable (B-type).

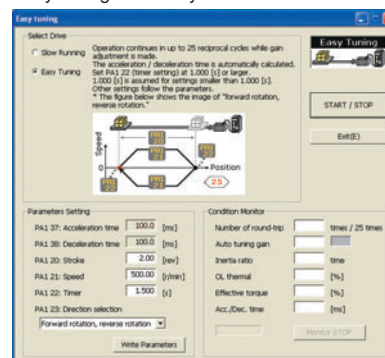

Simple setup

- Easy tuning and profile operation

Because the servo can be adjusted for the machine even if the controller program is not completed, the machine setup time is substantially reduced.

Easy tuning data entry screen

Up to 25 reciprocal motions of the servomotor are conducted while the gain is automatically adjusted.

- Sequence test mode

The controller program can run even if the machine is not completed. The efficiency of program debugging is improved.

Sequence test mode data entry screen

The sequence of the host controller can be tested even if the servomotor is not connected.

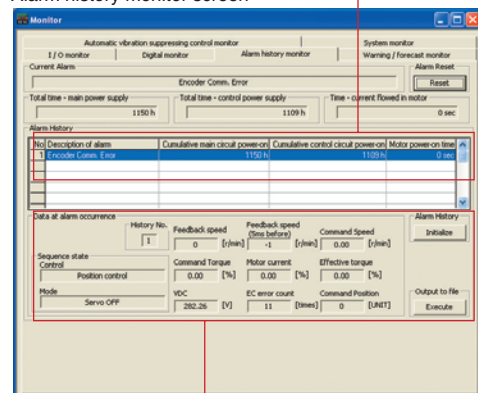

Enriched maintenance functions

- Functions associated with alarm

When an alarm occurs, data such as the speed and torque at alarm occurrence is displayed as well as the description of the alarm. Accurate analyses into the cause of the alarm are possible.

Description of the alarm and various cumulative operation times are displayed.

Alarm history monitor screen

Each piece of data at alarm occurrence is displayed.

- Life warning function

The life of consumable parts of the servo amplifier is calculated.

- Battery life warning
- Main circuit capacity life warning
- Cooling fan life warning

Warning monitor screen

The warning can be issued in a sequence output signal or displayed on the keypad.

Connection Diagram (Reference)

VV type

*1: Connect the shield to the connector shell of CN1 and CN2. The connector shell is at the ground potential (FG).

*2: Supply the control power (L1c and L2c) without fail. (The servo amplifier does not function with merely the main power supply.)

*3: To use in the source I/O, connect as shown with the broken line. Connect the surge absorber diode of the output load with the reverse polarity.

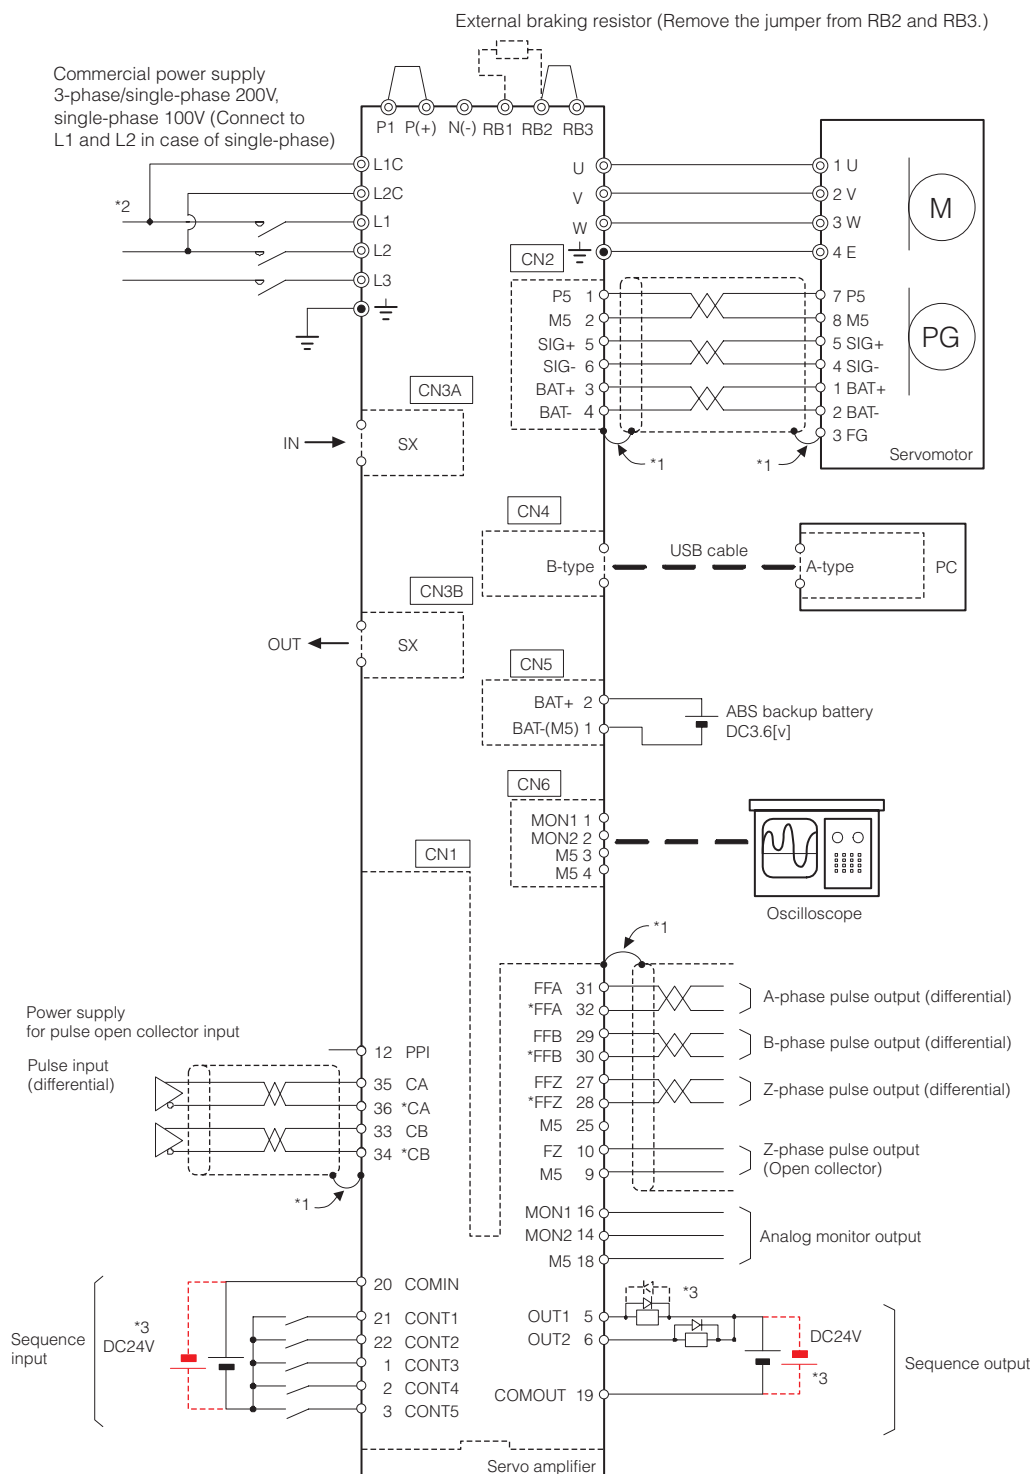

Caution

The diagram shown above is given as a reference for model selection.
When actually using the selected servo system, make wiring connections according to the connection diagram and instructions described in the user's manual.

Model List

Option

■Connector and cable

Name			Specifications		Product code	Type			
For main circuit of amplifier	Power supply connector (for amplifier control power and main power supply)		0.05 to 1.5kW (to 1.0kW with GYG)	1 set	RYWS043	WSK-S05P-E			
	DC circuit connector (wiring of external regenerative resistor, DC reactor, DC link circuit) *1		0.05 to 1.5kW (to 1.0kW with GYG)	1 set	RYWS044	WSK-R06P-E			
	Motor power connector (wiring of main motor power)		0.05 to 1.5kW (to 1.0kW with GYG)	1 set	RYWS045	WSK-M03P-E			
For sequence I/O (between host and amplifier)	Sequence I/O cable		All capacities	3m (bare wires on one side)	RYWS802	WSC-D36P03			
	Sequence I/O connector kit *4		Amplifier side : All capacities	1 set	RYWS022	WSK-D36P			
For encoder (between amplifier and motor)	Encoder cable		3000r/min for 0.05 to 0.75kW	2m (connector at both ends)	RYWS862	WSC-P06P02-E			
				5m (connector at both ends)	RYWS863	WSC-P06P05-E			
				10m (connector at both ends)	RYWS864	WSC-P06P10-E			
				20m (connector at both ends)	RYWS865	WSC-P06P20-E			
			3000r/min for 1.0 to 5.0kW 2000r/min for 0.5 to 2.0kW 1500r/min for 0.5 to 1.3kW	5m (connector at both ends)	RYWS806	WSC-P06P05-C			
				10m (connector at both ends)	RYWS807	WSC-P06P10-C			
	Encoder connector kit *4		Amplifier side : All capacities	1 set	RYWS023	WSK-P06P-M			
				Motor side : 0.05 to 0.75kW	1 set	RYWS036	WSK-P09P-D		
			Motor side : 0.5 to 5.0kW	1 set	RYWS025	WSK-P06P-C			
For motor power (between amplifier and motor)	Motor power cable	For main motor power *2	GYS, GYC : 0.05 to 0.75kW	2m (bare wires on one side)	RYWS868	WSC-M04P02-E			
				5m (bare wires on one side)	RYWS869	WSC-M04P05-E			
				10m (bare wires on one side)	RYWS870	WSC-M04P10-E			
				20m (bare wires on one side)	RYWS871	WSC-M04P20-E			
		For brake power *3	GYS, GYC : 0.05 to 0.75kW	2m (bare wires on one side)	RYWS874	WSC-M02P02-E			
				5m (bare wires on one side)	RYWS875	WSC-M02P05-E			
				10m (bare wires on one side)	RYWS876	WSC-M02P10-E			
				20m (bare wires on one side)	RYWS877	WSC-M02P20-E			
	Motor power connector kit		For main motor power *4	Motor side : 0.05 to 0.75kW	1 set	RYWS046	WSK-M04P-E		
				For brake power *4	Motor side : 0.05 to 0.75kW	1 set	RYWS047	WSK-M02P-E	
			For main motor power *4	Motor side : GYS 1.0 to 2.0kW GYG 0.5 to 2.0kW	1 set	RYWS027	WSK-M04P-CA		
				Motor side : GYS 3.0 to 5.0kW GYC 1.0 to 2.0kW	1 set	RYWS031	WSK-M04P-CB		
				For main motor power + brake power *4	Motor side : GYS 1.0 to 2.0kW GYG 0.5 to 2.0kW	1 set	RYWS029	WSK-M06P-CA	
					Motor side : GYS 3.0 to 5.0kW GYC 1.0 to 2.0kW	1 set	RYWS032	WSK-M06P-CB	
			For SX bus	SX bus cable		For VS and LS type servo amplifiers	0.3m (connector at both ends)	NP1C001	NP1C-P3
0.6m (connector at both ends)	NP1C002	NP1C-P6							
0.8m (connector at both ends)	NP1C003	NP1C-P8							
2m (connector at both ends)	NP1C004	NP1C-02							
5m (connector at both ends)	NP1C005	NP1C-05							
10m (connector at both ends)	NP1C006	NP1C-10							
15m (connector at both ends)	NP1C016	NP1C-15							
25m (connector at both ends)	NP1C007	NP1C-25							

*1: One connector is included in the accessory of the main body of the servo amplifier.

*2: Use this cable with motor power connector (on amplifier side) WSK-M03P-E.

*3: Use this cable as a brake cable of the motor equipped with a brake.

*4: Use this connector when the customer fabricates a cable at arbitrary length.

■Common options

Specifications					Product code	Type
ABS backup battery	Set of battery and case (*With case)			1 set	RYWS007	WSB-SC
	Battery (*Discrete replacement battery)			1 piece	RYWS003	WSB-S
External regenerative resistor	200V	3000r/min for 0.05 to 0.4kW			RYWS010	WSR-401
		3000r/min for 0.75 to 1.5kW, 2000r/min for 0.5 to 1.0kW, 1500r/min for 0.5 to 0.85kW			RYWS012	WSR-152
		3000r/min for 2.0 to 3.0kW, 2000r/min 1.5 to 2.0kW, 1500r/min 1.3kW			RGWG339	DB11-2
		3000r/min for 4.0 to 5.0kW			RGWG342	DB22-2
	100V	3000r/min for 0.05 to 0.375kW			RYWS011	WSR-751
For PC loader connection	RS-232C - RS-485 conversion adaptor		For connection of RS-485 port of VV type servo amplifier *1	—	NW0H003	NW0H-CNV
	Cable			2m (connector at both ends)	RYWS005	WSC-PCL

*1: Prepare a marketed USB cable (A-B type) for the USB port.

■ To all our customers who purchase Fuji Electric FA Components & Systems' products:

Please take the following items into consideration when placing your order.

When requesting an estimate and placing your orders for the products included in these materials, please be aware that any items such as specifications which are not specifically mentioned in the contract, catalog, specifications or other materials will be as mentioned below.

In addition, the products included in these materials are limited in the use they are put to and the place where they can be used, etc., and may require periodic inspection. Please confirm these points with your sales representative or directly with this company.

Furthermore, regarding purchased products and delivered products, we request that you take adequate consideration of the necessity of rapid receiving inspections and of product management and maintenance even before receiving your products.

1. Free of Charge Warranty Period and Warranty Range

1-1 Free of charge warranty period

- (1) The product warranty period is "1 year from the date of purchase" or 24 months from the manufacturing date imprinted on the name plate, whichever date is earlier.
- (2) However, in cases where the use environment, conditions of use, use frequency and times used, etc., have an effect on product life, this warranty period may not apply.
- (3) Furthermore, the warranty period for parts restored by Fuji Electric's Service Department is "6 months from the date that repairs are completed."

1-2 Warranty range

- (1) In the event that breakdown occurs during the product's warranty period which is the responsibility of Fuji Electric, Fuji Electric will replace or repair the part of the product that has broken down free of charge at the place where the product was purchased or where it was delivered. However, if the following cases are applicable, the terms of this warranty may not apply.
 - 1) The breakdown was caused by inappropriate conditions, environment, handling or use methods, etc. which are not specified in the catalog, operation manual, specifications or other relevant documents.
 - 2) The breakdown was caused by the product other than the purchased or delivered Fuji's product.
 - 3) The breakdown was caused by the product other than Fuji's product, such as the customer's equipment or software design, etc.
 - 4) Concerning the Fuji's programmable products, the breakdown was caused by a program other than a program supplied by this company, or the results from using such a program.
 - 5) The breakdown was caused by modifications or repairs affected by a party other than Fuji Electric.
 - 6) The breakdown was caused by improper maintenance or replacement using consumables, etc. specified in the operation manual or catalog, etc.
 - 7) The breakdown was caused by a chemical or technical problem that was not foreseen when making practical application of the product at the time it was purchased or delivered.
 - 8) The product was not used in the manner the product was originally intended to be used.
 - 9) The breakdown was caused by a reason which is not this company's responsibility, such as lightning or other disaster.
- (2) Furthermore, the warranty specified herein shall be limited to the purchased or delivered product alone.
- (3) The upper limit for the warranty range shall be as specified in item (1) above and any damages (damage to or loss of machinery or equipment, or lost profits from the same, etc.) consequent to or resulting from breakdown of the purchased or delivered product shall be excluded from coverage by this warranty.

1-3. Trouble diagnosis

As a rule, the customer is requested to carry out a preliminary trouble diagnosis. However, at the customer's request, this company or its service network can perform the trouble diagnosis on a chargeable basis. In this case, the customer is asked to assume the burden for charges levied in accordance with this company's fee schedule.

2. Exclusion of Liability for Loss of Opportunity, etc.

Regardless of whether a breakdown occurs during or after the free of charge warranty period, this company shall not be liable for any loss of opportunity, loss of profits, or damages arising from special circumstances, secondary damages, accident compensation to another company, or damages to products other than this company's products, whether foreseen or not by this company, which this company is not be responsible for causing.

3. Repair Period after Production Stop, Spare Parts Supply Period (Holding Period)

Concerning models (products) which have gone out of production, this company will perform repairs for a period of 7 years after production stop, counting from the month and year when the production stop occurs. In addition, we will continue to supply the spare parts required for repairs for a period of 7 years, counting from the month and year when the production stop occurs. However, if it is estimated that the life cycle of certain electronic and other parts is short and it will be difficult to procure or produce those parts, there may be cases where it is difficult to provide repairs or supply spare parts even within this 7-year period. For details, please confirm at our company's business office or our service office.

4. Transfer Rights

In the case of standard products which do not include settings or adjustments in an application program, the products shall be transported to and transferred to the customer and this company shall not be responsible for local adjustments or trial operation.

5. Service Contents

The cost of purchased and delivered products does not include the cost of dispatching engineers or service costs. Depending on the request, these can be discussed separately.

6. Applicable Scope of Service

Above contents shall be assumed to apply to transactions and use of the country where you purchased the products. Consult the local supplier or Fuji for the detail separately.

Reference Material

Motion controller MICREX-SX Series SPH

Various CPUs matching your purposes are included in the line of products.

- Module type (Up to 64 axes control)
- PCI bus compatible board type (Up to 32 axes control)
- Selection of program language best for the control (LD, ST or FB language)

Catalog (LEH982)

Programmable operation display UG Series POD

Various products ranging from 5.7" (QVGA) to 15" (XGA) types are included in the product line.

Full color (32,768 colors) realizes colorful and beautiful screen expression.

Catalog (LEH854)

SAFETY PRECAUTIONS

1. This catalog is intended for use in selecting required servo systems. Before actually using these products, carefully read their instruction manuals and understand their correct usage.
2. Products described in this catalog are neither designed nor manufactured for combined use with a system or equipment that will affect human lives.
If you are considering using these products for special purposes, such as atomic energy control, aerospace, medical application, or traffic control, please consult our sales office.
3. If you use our product with equipment that is expected to cause serious injury or damage to your property in case of failure, be sure to take appropriate safety measures for the equipment.

The Inverter Value Engineering Center (Suzuka Area) has acquired environment management system ISO14001 and quality management system ISO9001 certifications.
